

# Bridlington Town Council

## Case Study

Bridlington Town is a very unique scheme, as they require a scheme to be left in situ over a 3 year rental period to enable them to use the lights for various celebrations throughout the year. This requires having the confidence in delivering displays which can not only stand up to the rigours of all year round use, but also to be able to withstand the harsh winter weather of a seafront.

This scheme consisted of various column motifs, using reinforced aluminium framework with WSS & HDB as standard, making these frames lightweight but extremely strong and durable. All lighting in various colours are the latest LED, which offers longevity and great cost control.

Such as the standard and service of our frames and company, Bridlington have now extended their time with Lite for a further 3 years

The Town Council would like to take this opportunity to thank you for your excellent service over the last three years. Lite have successfully addressed any issues that have occurred over the last three years and the Town Council have been very impressed by the service provision.

Look forward to hearing from you with your proposals and designs for the next three years for the Town Council to consider.

Kind regards

Paula King  
Town Clerk, Bridlington Town Council
