Festive Lighting Case Studies

Welcome

We hope that the photos and products featured within this brochure will inspire you to enhance your existing town, village, city or Shopping Centre scheme this forthcoming Festive Season.

Latest innovations in our outdoor product range mean that the IP ratings have been increased from IP44 to IP66 or even as far as IP68, which means that water ingress into electrical joints should be massively reduced, thereby saving on expensive call-outs during the worst of the British weather!

Another impressive development this year is that our highly regarded MaxiLED festoon, is now capable of being DMX controlled to enable each and every lamp to be individually controlled in terms of both colour and animation.

You may also be aware that LITE are involved with the supply and installation of architectural LED lighting projects, some of which are featured in our Architectural lighting case studies Brochure.

Whilst we feature a large range of Festive lighting displays in the following pages, these are just a small cross section of the full range we can supply. We also design and supply many bespoke features that can be unique to the UK and be relevant to your town. We therefore strongly recommend that you call our head office (details shown on the back page of this brochure) to arrange a free, face to face consultation, as soon as possible.

Looking forward to hearing from you very soon!

Stockton

"In 2014 Stockton Borough Council set out a vision to provide a festive lighting scheme based on giant features within the landscape... LITE provided the relevant expertise and track record to articulate this vision and fabricate the bespoke features as part of the towns four week 'Stockton Sparkles' festival. LITE's communication is excellent and the project was delivered on time and to a high standard despite having to work to quite a tight deadline. LITE provided visualisations to help with the approval process and provided assistance on site throughout the installation period. Since the new scheme was launched back 2014, the new festive lights have been well received by the general public with thousands of people attending the launch event each year in what has become one of the region's biggest Christmas lights switch-ons."

Antony Phillips
Principal Urban Designer
Economic Growth and Development Services

Limited

“Newark Town Council has engaged LITE to provide its Christmas lighting decorations for over ten years; the first contract being taken out in 2006.

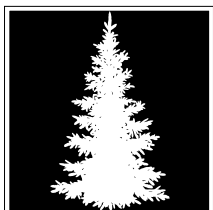

The longevity of the relationship with LITE is testimony in itself to the quality of service which is provided. LITE provide a full and complete service which minimises the input and work required by the Town Council to provide, install and maintain the Christmas lights.

Over the last ten years LITE have worked with the Town Council to continually update and improve the Christmas Lights displays. They have contributed significantly to achieving the Town Council’s aim to make the town an attractive place for the community and visitors over the Christmas period and thus enhance the economic wellbeing of the local retail and hospitality sectors.

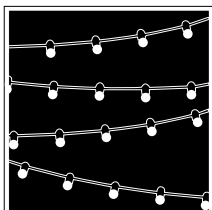

Over the last three years LITE have helped produce an amazing ceiling of lights in the Town’s Market Place, which is reputed to be one of the largest free standing light displays in the country. This required innovative thinking and assessment of what is possible and the outcome has transformed the light displays. Without LITE’s help and support these new initiatives would not have been possible.”

"I would like to take this opportunity to thank you for the professional way in which you and your team deliver our Christmas lights programme in Bristol.

From recommending the most suitable, cost-effective lights for us to meeting the technical and health and safety requirements of the city council, the service you provide is first-class.

Annual testing and installation of the lights is always carried out efficiently so that we can be confident that all will be in place for the big switch-on event and any issues which arise are always dealt with and resolved quickly.

In addition, you and the team are friendly, enthusiastic and always willing to help. "

"Ripley Town Council are delighted with the Christmas Lights LITE have installed for 2016.

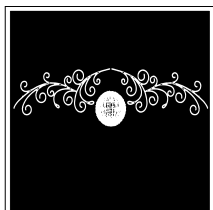

We have received many positive comments from residents and people just driving through the town contacting me to say how pleased they are with the display.

As you know this is the first year of a new contract with you and we cannot be more pleased with the Christmas Lights, the installation and the communication with yourself. Looking forward to 2017's display."

“Blackpool Borough Council has enjoyed a successful and close working relationship with LITE Ltd for many years in their capacity as a supplier for Blackpool Illuminations, where their deep understanding of exposed seafront illuminations is based on years of history and practical on-site testing.

In 2015 the new range of IP68 Maxiled Festoon Lighting systems from LITE Ltd was procured based on an extensive market testing regime in both static and RGB addressable versions, and has proved its worth and for us is ‘a natural’ for seafront festoon lighting applications.

Working alongside the Illuminations department, LITE Ltd co-delivered the project from concept to completion, with the right product, on time and on budget and based on this experience I would have no hesitation in recommending them and their products.”

"This winter's christmas lights display in Keswick is the best the town has ever had."

Cllr David Burn
Keswick Mayor

"People are so pleased with the christmas lights this year. They are modern, smart and stylish. I've seen more people taking photos of them this year than i have in the past."
