Mineral Fibre

A new concept in decorations
New pattern technology

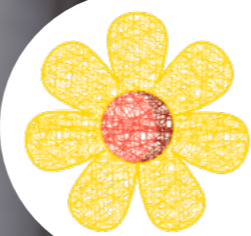

FIRE RESISTANCE

All our decorations can be classified M1 by construction or by treatment. This guarantees absolute safety from fire for ERP sites or sites with a high density of people.

The 10 complementary advantages:

- Corrosion resistance
- Chemical resistance
- Electrical and thermal insulation
- Thermal shock resistance
- Non-sparking and anti-magnetic (ADF/ATX)
- Electromagnetic transparency
- Easy cleaning, water, paint and varnish.
- Unlimited colour palette.
- Complies with road impact regulations.
- Easy to repair (vandalism and graffiti <1%).

OPENWORK SURFACE

Light passes through the openwork surfaces, increasing the vision of light sources, meaning less lighting, less energy consumption and less environmental impact.

Our partner specialises in the manufacture of mineral fibre structures in a variety of shapes combining design and aesthetics to meet a wide range of requirements in a variety of environments.

We guarantee a minimum 10-year life for our fibreglass structures in outdoor use.

The structures are light and very strong.

In the event of an impact, they do not break, they do not deform, unlike aluminium, and they are able to bear more than 20 times their own weight.

They will not be blown over due to their openwork construction. They can withstand winds of over 75 mph! (and more generally in any NV 65 Zone 4).

A SUPER STRONG STRUCTURE

The load-bearing capacity of our structures is remarkable. This allows for direct interactivity with visitors, as children and adults can climb on them...

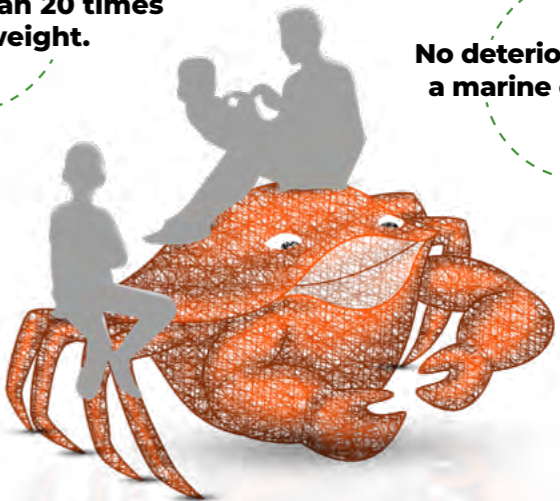

... Which they love to do!

Thermal resistance ranges from -50°C (without fear of freezing) to 50°C+

Our structures are able to support more than 20 times their own weight.

Guaranteed to last for 10 years!

No deterioration even in a marine environment

Environmental impact

It is important to offset environmental impact, but above all it is essential to plan.

Optimised production costs, optimised installation costs, optimised storage constraints, all mean more positive impacts on our daily environment.

In our industrial activity, the sustainable development approach translates into:

- Recycling of waste (or industrial by-products) and the use of plant resources
- Improving process efficiency (energy efficiency and energy saving)
- The promotion of healthier practices and products for humans and the environment
- Marketing of products through greener travel (hybrid or electric vehicles)
- A low carbon company, with goods being transported over a shorter distance
- Development of local trade and crafts
- Products manufactured at our premises in Pertuis (84)

SUSTAINABLE DEVELOPMENT AND ENVIRONMENTAL QUALITY

Our partner has focused its entire development on **manual production**, with or without lighting. The use of mineral fibre meets a strong commitment to limiting energy consumption during the manufacture of decorations. The decorations are made of mineral fibre that does not require energy-intensive machines for their manufacture: no 3D printer, no extruder, no press to ensure that the shape is maintained.

The energy efficiency of our workshop and our processes is one of the priorities of the management. Their energy consumption is not just the electricity consumed by the decorations. We offer low-carbon decorations.

All illuminations are CE and RoHS compliant and use LED technology

MINERAL FIBRE WEAVING TECHNOLOGY

Positive points:

- Environmentally friendly
- Fully recyclable
- Rot-proof

WE CAN SAY THAT ALL OUR DESIGNS ARE

99% RECYCLABLE

100% UNIQUE

Our teams have been trained in our **UNIQUE** know-how and we work hard to develop the **skills** of our employees.

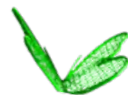

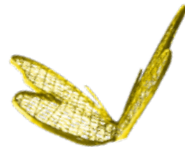

100% HANDCRAFTED

At ADS DESIGN **People are at the heart of our development !**

100% QUALITY

Hard work, due care, expertise and **high standards** are values that we pass on to all our new recruits.

WHAT WE DO:

The structures we offer can be easily adapted to many areas:

01. Summer decorations
02. Christmas lights
03. Giant 3D letters
04. Decorated roundabouts
05. Green spaces

WHAT WE WANT:

To bring beauty and life to public spaces, with respect for ecological and economic issues.

100% recyclable

Circular economy

Locally-sourced raw materials

100% RECYCLABLE WITH 0% WASTE FOR A 100% CIRCULAR ECONOMY

Hanging decorations

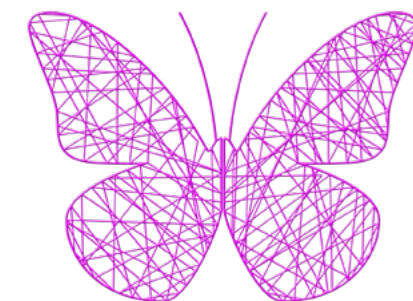

Hanging decorations

These colourful hanging decorations are the highlight of our summer decorations and will make your streets look great! They will bring smiles and fun to your town centre!

(We have selected a basic palette of 5 colours: yellow, orange, green, blue and pink. But we can also produce other colours from the RAL colour chart according to your wishes).

POLE-MOUNTED STRUCTURES

Are your streets too wide to extend a suspension line across?
No trees to decorate your avenues?

We have the solution!
Our designs can now also be mounted on poles.

Simple and effective for a guaranteed result:

Recycled aluminium post
(the number of branches and colours can be changed)

Choose your designs
(Mix our different models, mix the colours)

There you are!

Adaptable to all our products:

(H 2 x W 1.40 m)

With butterflies (3D)

Available colours

Reference: 900 930

(The number of branches and patterns can be changed)

(H 2 x W 1.40 m)

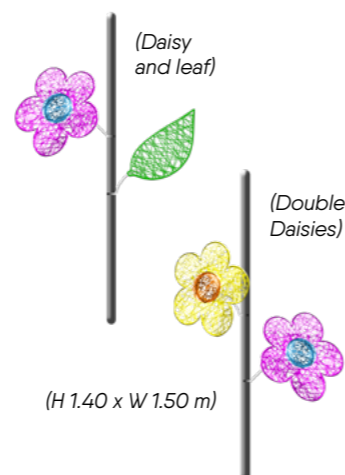

With dragonflies (3D)

Available colours

Reference: 900 931

(The number of branches and models can be changed)

(H 1.40 x W 1.50 m)

With daisies (3D)

Available colours

Daisy and leaf: 900 932

Double daisies: 900 933
(The number of branches and models can be changed)

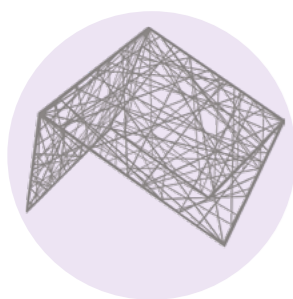

MODULAR STRUCTURES IN BLOOM

An original and artistic concept that will enchant you with its modularity and its multiple possibilities. The variations in shape and colour are endless.

A simple beginning:

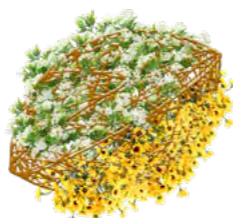

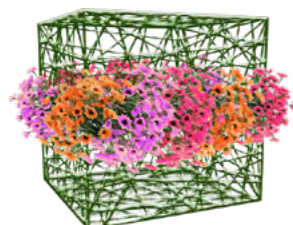

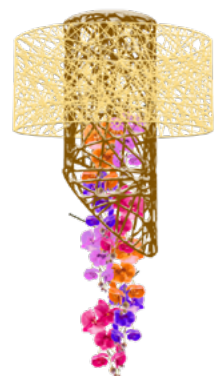

A 2D or 3D structure
(Square, half-sphere, column, ...)

A plant
(Plant, leaves, flowers...
or a whole set of plants)

A multitude of variations:

Let your
imagination run wild,
or
let us design one
for you!

*"The most beautiful of all flowers is the
flower of freedom."*

Jean Fischart

Ground decorations

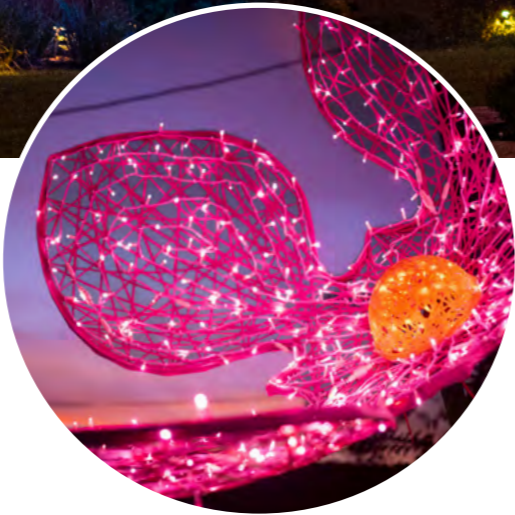

Ground decorations

Say it with flowers...
Springtime enchantment, day and night, thanks to their extraordinary dimensions, the effect is guaranteed!

THE INCREDIBLE BOUQUET OF FLOWERS

(Exclusive creation LITE)

Our incredible bouquet of flowers is stunning in size (up to 8m high!), combined with XXL coloured flowers, you can imagine you're in the world of "Gulliver's Travels"!

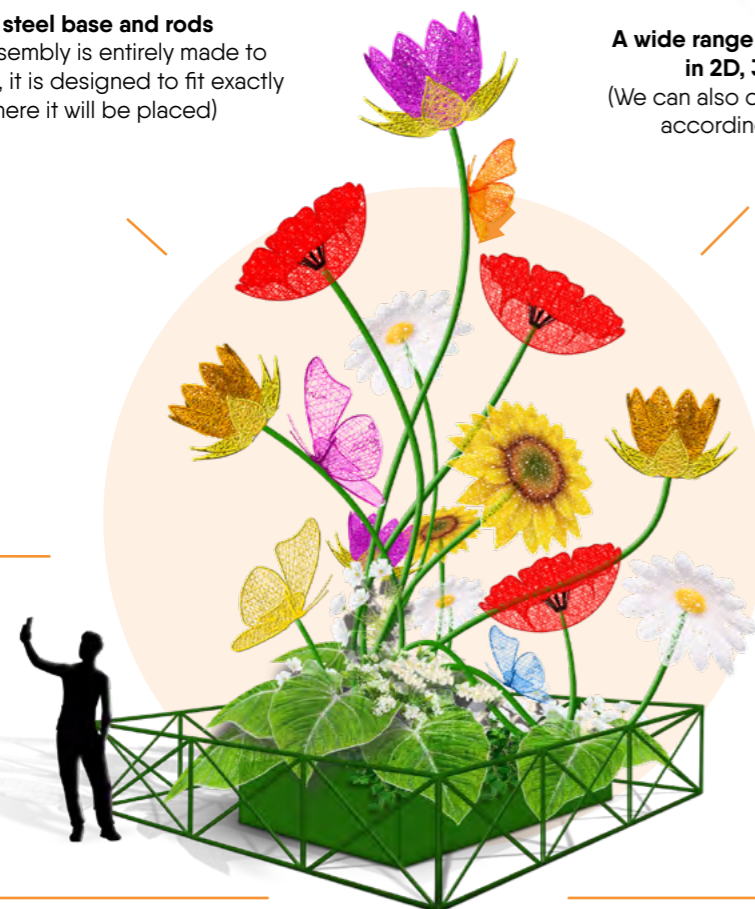

Made-to-measure in XXL size!

A steel base and rods
(the assembly is entirely made to measure, it is designed to fit exactly where it will be placed)

A wide range of flowers and leaves in 2D, 3D is available.
(We can also create them on request according to your wishes).

A little extra:
The composition can be enhanced with giant butterflies and various small synthetic plants. And also a protective barrier adapted to the size and design of the bouquet

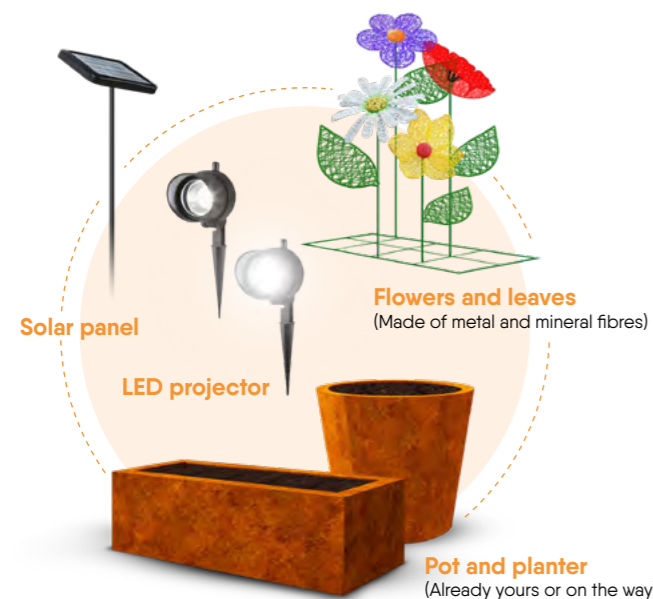

FLORAL SETS SOLAR LIGHTS

(An exclusive LITE concept)

Make your urban spaces bloom with our floral motifs specially adapted to your planters. These decorations can be equipped by an LED lighting system using a mini solar panel, so you can enjoy the bouquets day and night, with no need for an electrical connection.

... And above all, no more watering!

Decorative, sunny, durable, long-lasting and maintenance-free!

Giant lily pad
(seen at night)

Beautiful daytime alleys of flowers
(At the same time our solar panels are recharging...)

Flowered and illuminated alleys at night
(The bouquets are lit by a solar LED projector with zero electricity consumption)

Do not hesitate to contact us for more information!

YOUR TAILOR-MADE PHOTOBOOTH

Get with the "photobooth" trend!

We offer to design custom-made structures for your festive events
(Valentine's Day, May Day, Christmas...).

Whatever your requirements, we'll create a photobooth to make you smile!

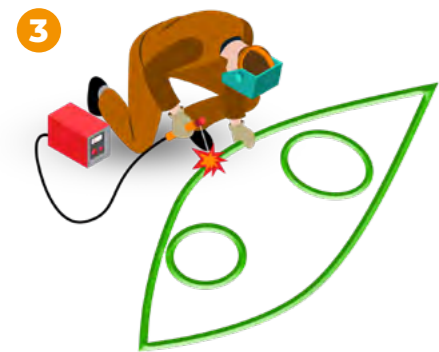

Your Photobooth in 4 steps:

The design studio sketches out a draft of the project.

The sketch is then simulated in 3D computer graphics.

The structure is manufactured, welded, woven, painted and assembled in our workshop.

And there you have it!
Loaded, it's delivered!

... Some examples:

Valentine's Day

Wedding

Fruit festival

GIANT FISH FOR RECYCLING BY THE SEA

The environment is our priority and raising awareness of sustainable development is a major issue. Our plastic waste receptacles are designed and manufactured in our workshops. They are fun, educational and ecological.

Giant fish rubbish bins / 185 cm (3D)

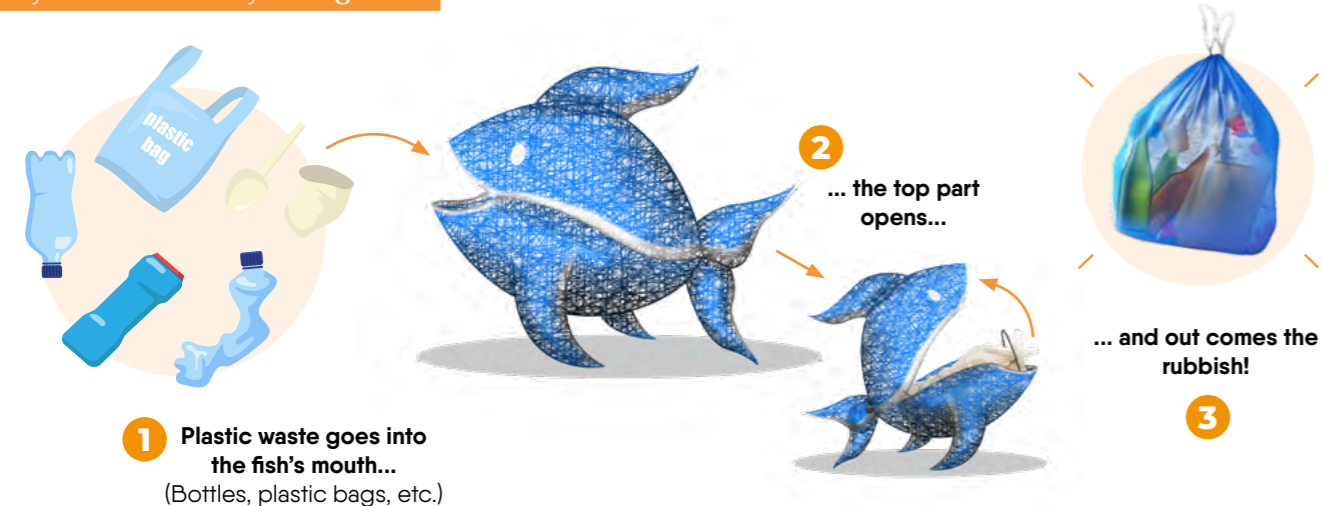

Available colours

(multiple colours)

Easy to use and they look great!

A multitude of variations:

We can offer you different colours or sizes to make each model unique!

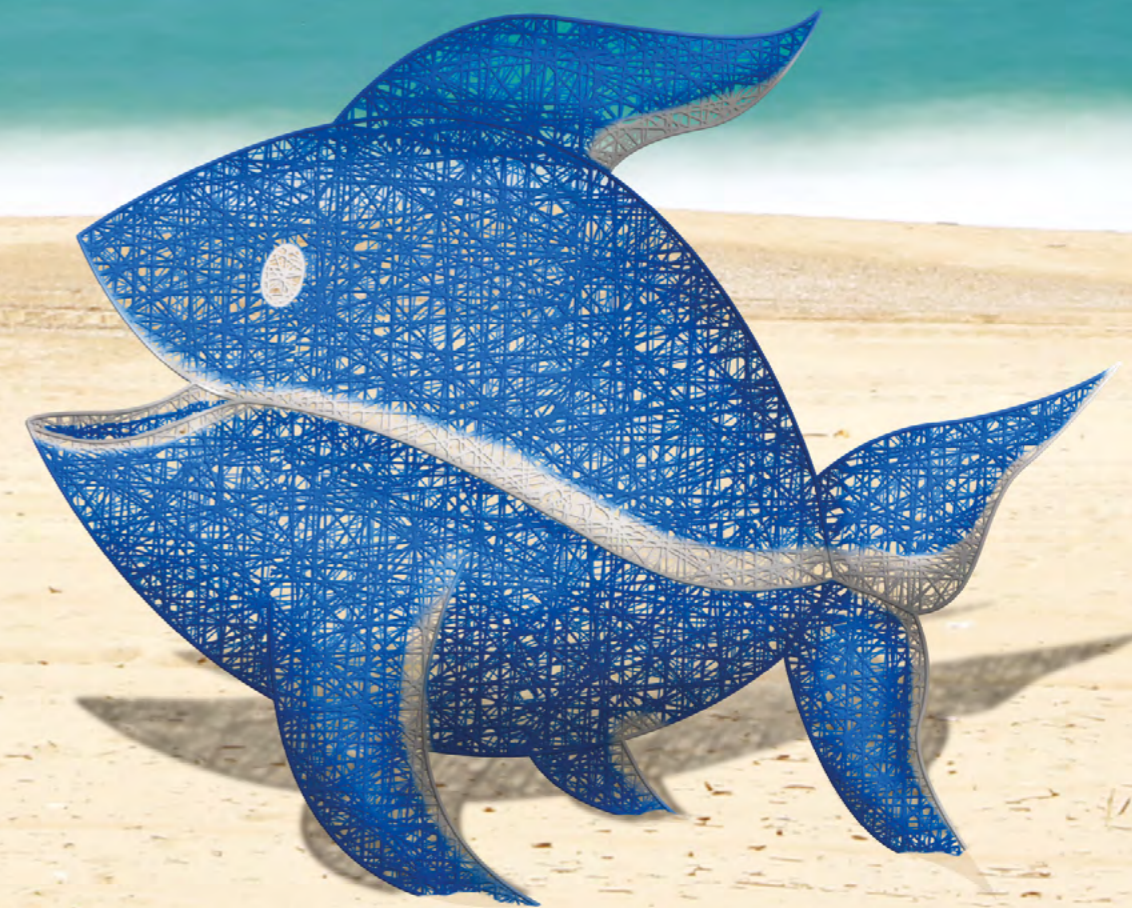

Would you like another kind of fish or a particular animal?

Ask us to make a tailor-made model!

"We do not inherit the land from our ancestors, we borrow it from our children."

Antoine de Saint-Exupery

SHADED BENCHES

(An exclusive LITE concept)

At the height of summer, relax for a moment on a cool bench, savour the moment under the shade of our flowering mineral fibre arches, or under a large and romantic XXL parasol.

Umbrella with base
Reference: 130 055

The shaded and decorative “umbrella” bench.

Designed as an off-set parasol, it can be tailor-made to suit the location.

- Customised design
- Very strong and durable
- Very large choice of colours
- The openwork material means the wind resistance is low, unlike a conventional parasol

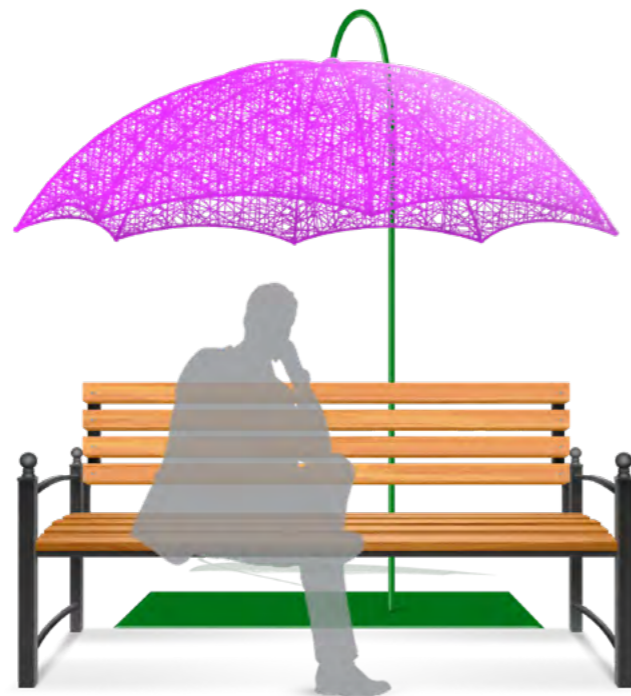

Bench umbrella / 250 cm (3D)

Available colours

(multiple colours)

Reference: 130 054

The shaded and decorative “flowered arch” bench

Our “flowered arch” bench is very popular at events, trade fairs and weddings.

- Tailor-made design
- Super strong and durable
- A very large choice of colours and flowers
- The openwork material means the wind resistance is low, unlike a conventional parasol

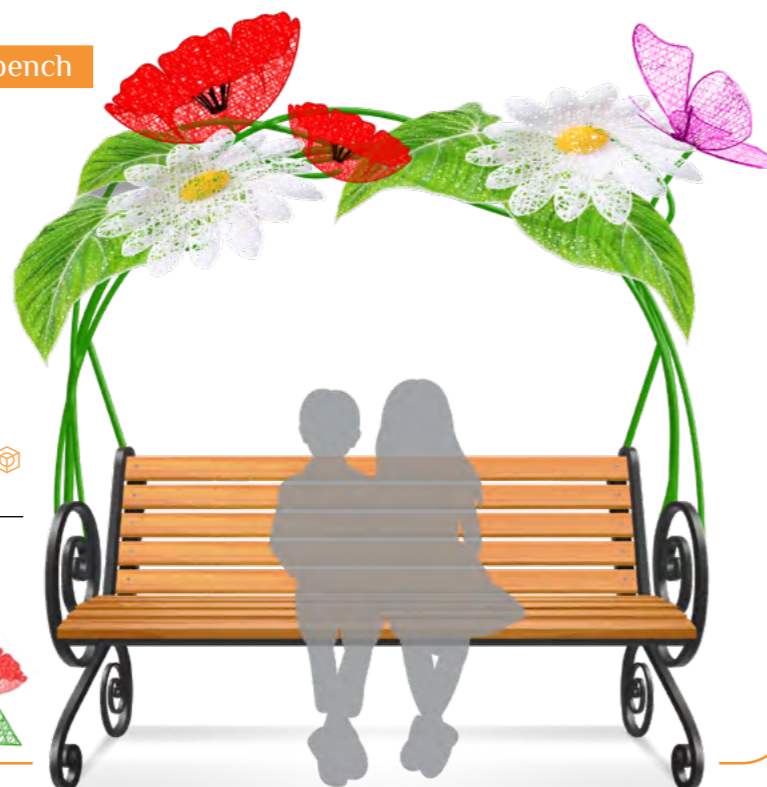

Flowered arch bench / 250 cm (3D)

Available colours

(multiple colours)

Reference: 130 056

Enliven your public benches while providing shade and convenience to users with our decorative structure concepts.

3D ROAD SIGNAGE (DESIGNED FOR SCHOOL CHILDREN)

Our 3D mineral fibre characters and designs are perfect for use as road signs to warn both vehicles driving near schools and, more importantly, young schoolchildren to be careful when crossing the road.

Reference: 130 041
(Also available in 150 and 300 cm, can be installed on the ground or suspended)

Jersey / 90 cm

Available colours

(multiple colours)
Reference: 130 036
(Also available in 150 and 250 cm, can be installed on the ground or suspended)

The advantages of LITE:

- Tailor-made design for every discipline
- A super strong and durable structure
- A very large choice of colours
- The possibility of integrating a solar LED spotlight

Examples of 3D sportsmen and women,
Our designers work on the project, they are then made to measure in our workshops.

Dimensions approx. 200x150x100 cm, but each model is variable

Giant 3D letters

"The word is the body of Time."

Dominique Fourcade

Giant letters 2D and 3D

Give height to your communication!
We manufacture XXL size illuminated letters that can be adapted to any event
(national holidays, sports celebrations, Pink October...)
You'll love the attention they get!

The Giant 3D Classic Letters

White weave, the letters can be coloured on request

Illuminated 3D letters with integrated projectors!

Classic letter / 3D (180)

(Also available in 50, 70, 100, 125 and 150cm high)

Our manufacturing system allows us to guarantee total durability. Our structures are both strong and light. Our weaving technique allows for an aesthetically pleasing appearance by day and night (including the integration of LED spotlights in the structure).

Reference: LETTER-1.80

Accessorise your letters!

You can now personalise the letters with various decorative accessories or with symbols specific to your city, make your choice according to the season!

Examples:

Some design ideas:

Thanks to our well thought-out fixings and simplified electrical connection systems. You can easily change the themes with interchangeable motifs for your 3D lettering.

LITE innovations!

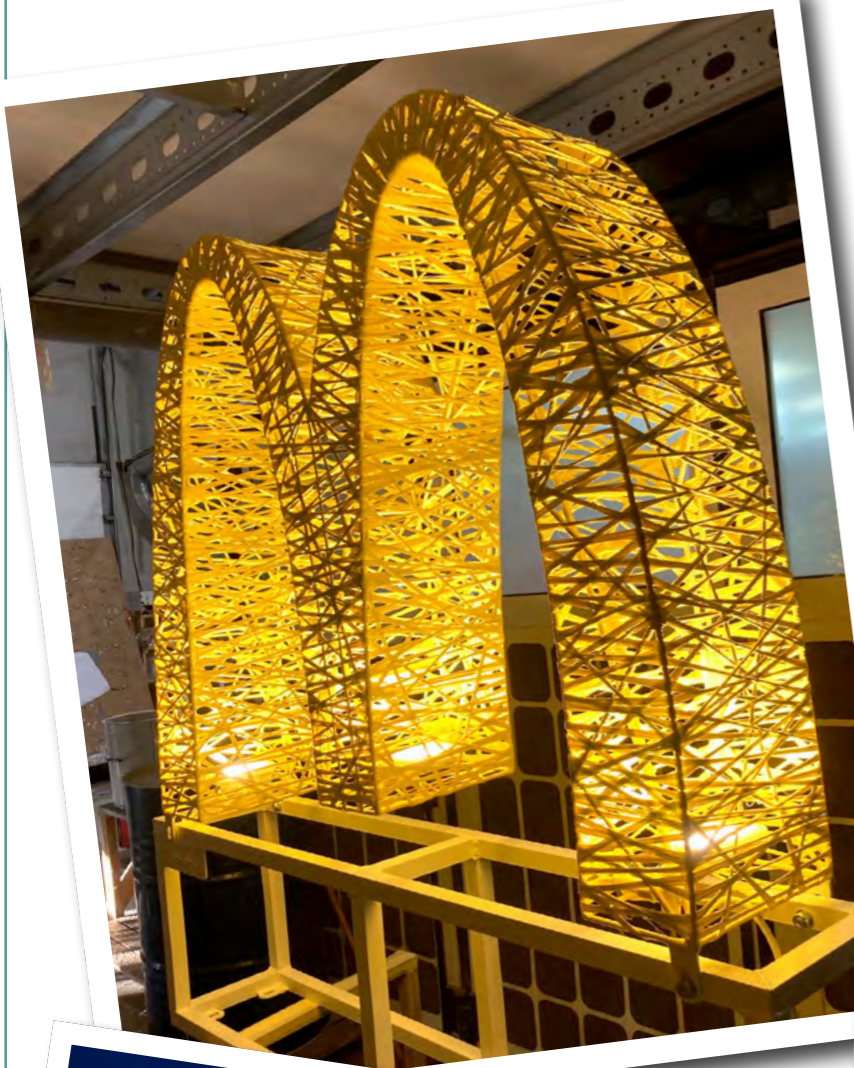

RGB Projector with DMX control

Thanks to DMX control, we can offer you very complex animations in terms of colours, flashes, power and movements. This allows us to create and integrate various event-specific sequences that can be controlled as desired.

Giant 2D and 3D customised letters

We are also able to make letters of different sizes, shapes and colours, in 2D or 3D, so don't hesitate to contact us!

Tailor-made scenes

Tailor-made scenes

Our design studio and our production workshop together create beautiful scenes from life to decorate and illuminate your green spaces.

1 Iconographic study

2 Computer graphics of the 3D structure

3 Manufactured in our workshops

4 On-site installation!

We can provide our structures with solar projectors on request.

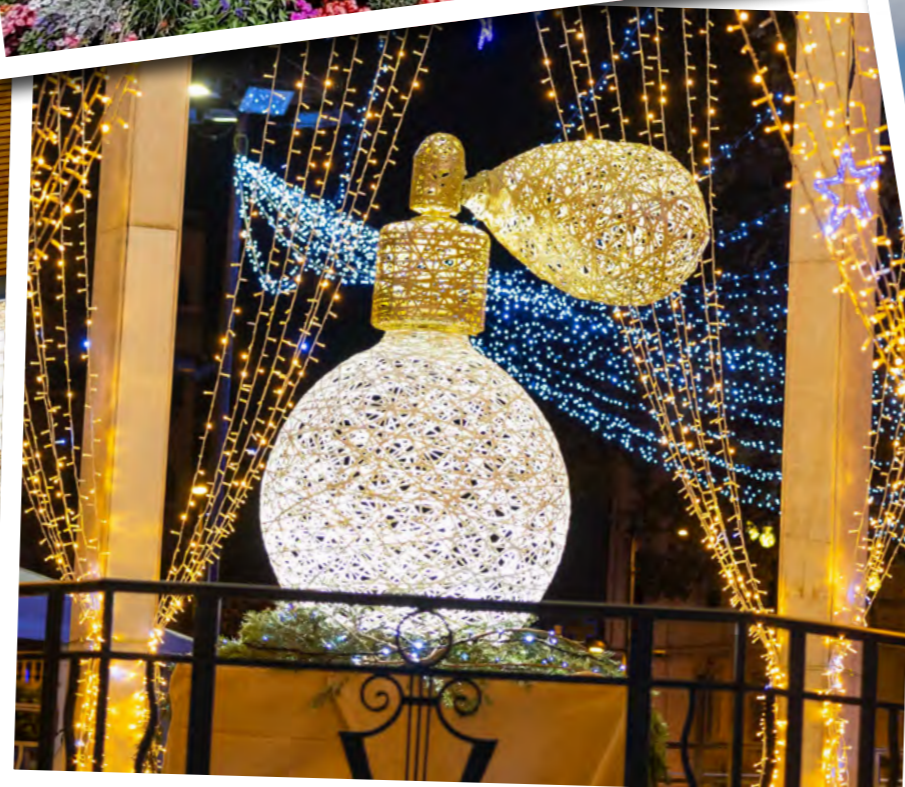

Eco-friendly structures and solar-powered floodlights for less environmental impact!

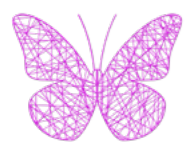

EXTRAORDINARY SETTINGS

Summer is a good time for cities to highlight their attractiveness, notably with the permanent or ephemeral installation of structures symbolic of their past, recent or future history.

Major brands also lend themselves to this, using our manufacturing techniques to display their logos in an original, playful and aesthetic way and above all with better readability.
